Projects

SUAV-E | HTML, CSS, JavaScript and ReactJS

June 2024

- Designed and Developed a Web based application using HTML, CSS, JavaScript and ReactJS is a user-friendly and intuitive E-Commerce Front-End application.
- SUAV-E allows you to navigate through your desired clothing product seamlessly.
- Implemented features such as search bar, dropdown menus for categories based products, wishlist, shopping cart and a login page to enhance the application's functionality.

Financtionary | HTML, CSS, JavaScript and ReactJS

May 2024

- Implemented an intuitive and user-friendly interface that allows users to effortlessly search and understand financial concepts, ensuring a smooth and efficient learning experience.
- Integrated responsive design elements to make the platform accessible and visually appealing across various devices, enhancing user engagement on both mobile and desktop platforms.
- Collaborated closely with team members to contribute to both the front-end design and functionality.
